

SOUVENIR

2011-2015

Sometimes you will never know the value of a moment until it becomes a memory.

- Dr. Suresh

Remembering My Classmates, After Few Years,
My Eyes Were Filled With Tears,
Everyone Is Busy A Lot,
No One Escaped Destiny's Plot,

Saw The Girl, Whom Once I Thought As My Best
Friend,
Oops! Today She Is Some Body Else's Girl Friend,
After Months Remembered About Her For A Little
While,
Heard She Is Happy, That Made Me Smile,

Project Reviews To Campus Interviews,
Nicknames To Last Bench Games,
Cultural Rehearsals To Love Proposals,
Short Term Crushes To Classroom Blushes,
Everything Is Fresh In Our Mind,
Wish Life Could Just Rewind,
Lets Laugh, Play And Rejoice,
Once Again Become College Guys,

Charting And Laughing. We All Were In Elation,
Till The Painful Moment Of Separation,
When It Was Time To Part,
We Returned With A Heavy Heart,

Today Life Is Full Of Commitments,
And Too Many Worries,
But Those Cherished Moments,
Will Leave Forever In Our Memories.

- Dedicated to seniors by Abhijith Magal, MED

Message By Editor

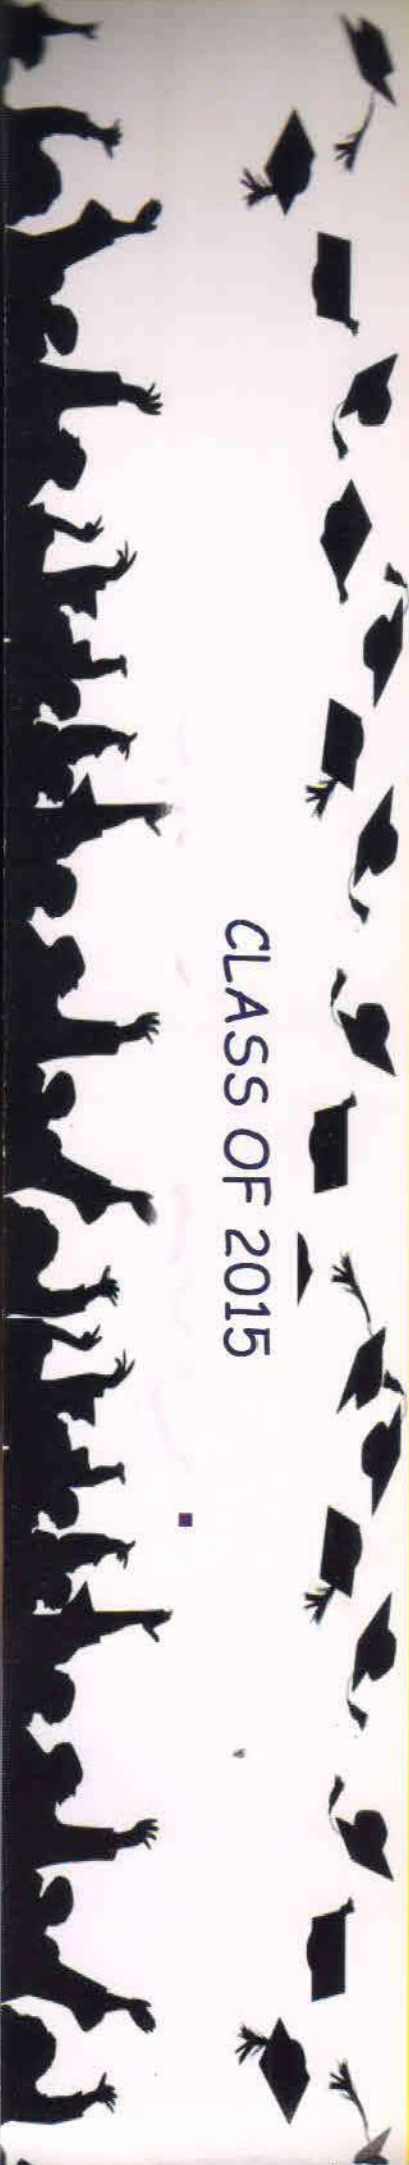

Editorial team feels proud to present KJST with premier souvenir. This is a recollection of memories all the final year student who have spent their blissful chapter's of their life.

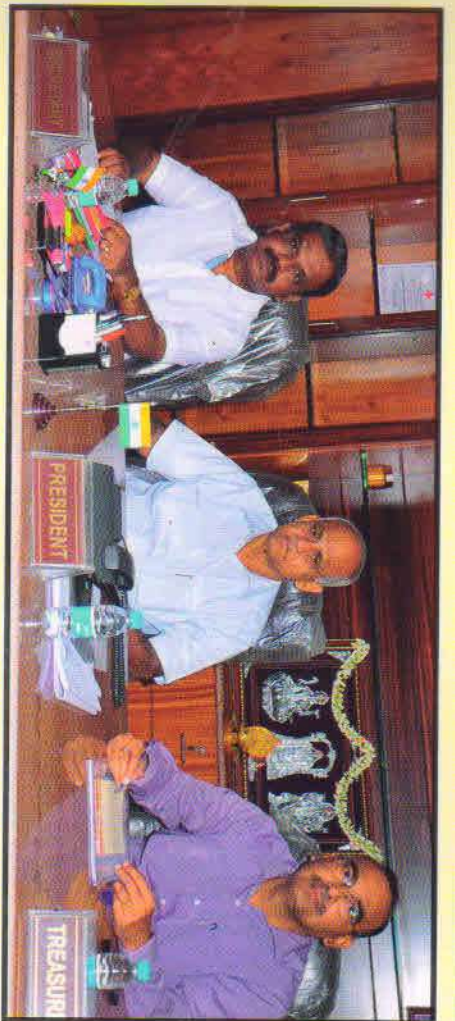

ALL THE BEST TO ALL OUTGOING

STUDENTS!!

Live authentically and save each precious memory of
your journey. Because when u arrive at your destiny,
Another journey begins....

CLASS OF 2015

We are delighted to learn that the **Kannavari Sangham Institute Of Technology (KSIT)** is releasing its premier **souvenir** with excellent team spirit and untiring effort. The members of this institution prove their excellence in bringing out the inherent talents of the students in curricular, co-curricular and extracurricular activities.

As each reader goes through the pages of this souvenir-they will find that there has been a journey that shows how a group of likeminded people started services in the field of education and how it has made a difference in the lives of our students. Its a journey of love care and integrity.

Indeed KSIT is built upon a very strong foundation and undoubtedly doing wonderful service in the sphere of education. As you look back on these 15 years, different images come before us.

In each of our programmes, we see positive trends. From a limited infrastructure initially, we have now come to a position to what you see wonderful buildings and up to date state of act modern technologies.

We are glad to know that present batch of **2011-15** students are graduating and to know the fact that many students are placed in reputed companies.

We take this opportunity to wish you all the graduating students of **2011-15** batch the very best and have a bright future ahead. Make your alma mater proud and the flag of KSIT fly higher in all directions.

-MANAGEMENT

My dear KSITians!!!!

I am very happy to meet all outgoing KSIT students through this page. KSIT has stood above the rest in its approach to education and in its pedagogies. The ways we teach and the ways our students learn are unique and creative. Consistently, we never hesitated to look into our deficiencies and transform us to an efficient agent of social change and thereby enabling the KSIT students to become globally competent. We have lot of plans and dreams in the years to come to execute in association with alumni. This will certainly go a long way in enhancing quality in education in accordance with the objectives of the institution and in serving society at large with sensitivity and commitment.

I feel happy when the bright and talented students perform remarkably well. However what makes me happier is when a slow learning student progresses steadily from poor performance to better performance, moving towards excellence.

I am sure KSITians will experience sadness as they say farewell to friends and to institution which has supported learning, encouraged ambition and established wonderful memories. However, I am confident that KSIT students will also be ready to move on to the next exciting challenge, having been more than adequately prepared for the next stage of their lives. We will ensure that they have strong foundation for becoming leaders for life, based upon our core values, experiences and the education we have given them. Wishing you wonderful life and success in your endeavors.

Thank You & Farewell!!

Dr. T.V. Govindaraju

MANAGEMENT COMMITTEE

SITTING (LEFT TO RIGHT)-

SRI R.LEELA SHANKAR RAO (JOINT-SECRETARY), SRI BLOKANADHA NAIDU (JOINT- SECRETARY), SRI K.VENKATESH NAIDU (HON- SECRETARY), SRI T.RAMACHANDRA NAIDU (VICE -PRESIDENT), SRI Y.RAMACHANDRA NAIDU (PRESIDENT), SRI K.SHIVA RAO (VICE-PRESIDENT), SRI D.RUKMANGADA (TREASURER), SRI L.KRISHNAMURTHY (INTERNAL AUDITOR).

MECHANICAL ENGINEERING

NAIDU
SHIVA
UMAR

"Engineering? Which college?" "Mechanical". The movement a girl gives this answer, there will a lot questions shot on here. "Why Mechanical? Isn't tough? How many girls are there?". All these four years I have been answering the same. To start off with the first year, I was the only one girl in my classroom among 60+ boys. But that didn't bring my courage down. Though there wasn't much communication between us, they were always there for me when needed. To my surprise I even got a chance to represent my college in ALL INDIA VOLLEY BALL tournament. The last movement after the first year was being a topper of our branch in second semester. When the results were out, I got a call saying "YOU ARE THE TOPPER". That was the first time ever I got a call from one of my classmates!!!! Coming to the second year, I got a company of four girls who joined our branch. I got a chance to build up college team with the help of my seniors and interested enthusiastic team members. The tournament and the fun we had in practicing are always fresh in memory. Thanks to my seniors and interested enthusiastic team members. "ANANYA-13" that was the time where I came into contact with my super seniors. I feel honored to say about the brotherly love care, concern, respect you get from all the mechanics towards girl in mechanical is unmatched!!!! Winning the department cup in sports as well as ANANYA will always stay as the feather in the cap of our department. In the third year, we started a newsletter from our branch. It taught us a lot of management skills. We had a good time in the industrial visit too. Coming to the final year, the bondage with my classmates as well as my juniors has increased. Student life is coming to an end so soon. As a student here, I would really miss those birthday bumps, mass bunk, teasing people, staying in college for Amaya preparation, practicing volleyball and the best part Teachers. Yes I would miss all these in future, but the memories will be treasured in my heart always.

Jahnavi B M

College life ushers in a completely new stage in the educational career of a young student. As compared with school life it is a life of liberty, self-respect and confidence. The way in which you grow up, mature, and find out who you really are, is something one looks forward to and was no different in my case. I still remember my first day in KSIT, the first class which eased my nerves. Teachers have always been behind the success stories of students here. The energy is commendable and I have certainly enjoyed listening to each and every lecturer and I mean it. I will be failing in my duty if I forget to mention the motivation we received from the faculty to do well just not in academics but in all aspects of curriculum that for me stands out as THE FACTOR in KSIT. Adding to it the friendly nature of teachers here has had great impact on me directly or indirectly.

Yanshi Krishna

From being a reserved conservative person to bold and expressive, KSIT threw opportunities to express myself. Be it being a part of TEAM EMANATION or participating in the consecutive winning triumph of Inter department in ANNANYA. Organising competitions, workshops, seminars to participating in a few though were tiring and demanding, but brought immense pleasure and satisfaction. From immense pressure of placement activities to the joy of getting placed, these are still live memories and shall remain so for long. Last but certainly not the least memories of my on going project shall be being on the already well decorated cake. The knowledge gained, the opportunities availed and the friendship made during these four years of stay at KSIT shall go a long way in determining the future life and career of a young man

After my CET counseling four years ago I was slightly disappointed that I couldn't get into one of the top colleges and had to land up in KSIT. But after spending these four years here, I can proudly say that KSIT is one of the best colleges you can get into!!! This is not just a boost for I have enjoyed every moment that I spent here. All lecturers took keen interest in the subjects and taught us very well. They all took personal care and ensured that we stayed high on our spirits. Apart from curriculum, we had so many opportunities to learn from. Be it a seminar, workshop or ran navami and ayudh puja celebrations, everybody in department would involve and make the event a cherishable one. There were more to come- The Aero-modelling club, Emanation newsletter team, KSIT SAEINDIA Collegiate Club, and not to forget SPORTS DAY and ANANYA-Cultural fest. In all, it was a wonderful time spent here and I'm still wondering if 4 years really went by or was it just a dream!! Once I step out, I will miss the warmth of mechanical department and of course the KSIT environment!!!

COMPUTER SCIENCE

September 12, 2011 a filmy first day of my college. Woke up early in the morning enthusiastic about my first day of college, got read of expectations, had breakfast and walked up to my vehicle to notice sadly that the tire was flat. I didn't have time to get it repaired out about the bus routes and ran to the bus stop. After waiting for sometime i got into a heavily crowded bus almost hanging in the door college 15 minutes late. Standing at the gate of the college I was deciding whether to enter or to start off fresh tomorrow. But since I lot of effort to reach college I entered and went to the notice board to see which class I had. Then with least interest and a lot of fear, I physics lab and asked permission to enter. The awesome, cool, fabulous lecturers of Basic Science and Humanities department with a me to join the class. Starting from that moment the happiness and awesomeness of my college life began.

The time I spent in KSIT is the happiest days of my entire life. I found awesome friends and was guided by the most fantastic KSIT to become a better person that I am now. The experiences at KSIT have made me a better person and have taught me to excel in I had a lot of new experiences like working in a group, studying in last moment for exams, mass banks, taking part in fests, learning events, to coordinate in a group and most of all to enjoy life.

Anusha, K.A

As the popular saying goes, "Things may end. But memories last forever", and i couldn't agree more! Although it's been four long years, it seems like just yesterday that I entered K.S.I.T. I still remember my very first day at college. I was clueless, and a little nervous too! But i must say, that unlike most other times when I had to enter a new institution, i never felt the slightest bit alienated here, at K.S.I.T., even on the very first day! The teaching staff of Basic Science and Humanities department, were nothing less than encouraging and invigorating, and fortunately, the same trend continued, even after entering the department of Computer Science & Engineering, which according to me is the BEST department! This paved a way for me to discover my own capabilities, and to pursue my engineering with all seriousness and passion.

Shrutika Kashyap

During the last four years of engineering, I met some amazing people here, who eventually came to be my closest friends. Without them, engineering would have been no fun at all! Be it our classroom shenanigans, the last minute cramming for internals, taking part in cultural fests, hogging *Gobi fried-rice* at college canteen, or even the inglorious mass-bunks, they have always been with me. But most of all, they have also been there in my tough times, to help and support me, and I have surely learnt a lot from each one of my friends. Today, we have all come a long way in our lives, and K.S.I.T has played an important role in it!

Apart from providing excellent teaching, the thing I like the most about my department is the support we get from our faculty for organizing events, be it cultural or technical. Many technical fests, seminars and workshops have been organized by our department for the benefit of students, and has won of appreciation from the college. One of my remarkable achievements in this college would be the day I presented my first technical paper in a national level organized by CSE department, and won a prize! It was exhilarating, and i will always be grateful to my college and my department for providing me with such a full opportunity!

Shrutika Kashyap

My memories in this college are way too many to pen down, but have been well accommodated in the powerful memory chip within my brain, and I'll make sure them because it is something I will always cherish!

ELECTRONICS & COMMUNICATION

The day when I arrived late to Math class which became an advantage for me to find beautiful friends, who then I never knew, would become great memories of my life was the 1st day to start with at KSIT. September 2011 was the time when we started to know each other and speak with each other. Now it's April 2015 and still we have the endless conversations. It seems only yesterday that I was in my 1st year and seems like days are running at the speed of light!! New branches of the tree (Lecturers) which hold each of its leaves (Students) firmly as a Polestar to show the right path, new Root of the tree (HOD) which holds firmly on to the ground such that none of the tree's members fall, new set of rules set by the Ground itself (Principal) to follow such that tree has a longer Life, new friends, new well-wishers, new mistakes and new Lessons of life, new Subjects every Half-year and new Labs, four new birthdays of Life and 400 people to make it as special as possible, a few silly fights followed by SORRYs, a few sorrow moments where thousands of tissues came ahead to wipe the sorrow tears, a huge number of co-curricular activities to take part and plenty of people to cheer and create Zeal into me are my memories at KSIT. They last long and forever....

Deepthishree.B.S

Uh.. Here I go, memories, memories!!! While looking through the heap of the pictures I realize how important these memories are to me!! One such memory is when me and my friends shot a short film which was a perfect flop :p But then we had a blast during the shoot which was the best ever time in the college.

"KSIT" which is being my second home from four years not only taught me field theory, VLSI, communication etc, but also did teach me how to handle things and changed my outlook on life.

Of course, college life is one such part in anybody's life which once completed will never come back. I had complete fun-filled college life which includes smiles, tears, fights, secret-crushes, celebrations, labs, records, bunking, internals assignment and many more

Thank You KSIT for being my most evocative memory.....
Dedicated to all my friends..

Kavyapriya.D

Every lode meet their buddies at a very special place... in a very special manner.... Yes, I did meet my buddies, who made the stell very special and, the whole span with them an eve of fest....

At the first ,I met four!!! An year later I met a soul ,who joined to make it more.... the latter one was me, a moulded one!!... it was that 'me' who felt the awesomeness of pals, adventures, fearlessness....

O freshness was all the transition I had...at the end of academics, got the beginning of the new 'me' as an excited atom with whole lot of colorfulness.

Dedicated to that special place 'MY KSIT' and my fantabulous 4 bosom buddies....

Nikitha.H.R

Bangalore fondly remained as Bengaluru ,when my Dad first told me about the place I instantly wanted to be a part of it but was also scared about the risks and the situations that I might face, of the adjustments to be made. My main concern was communication as I was unfamiliar with the local language .When I first came to college I was just another shy and scared fresher with a lot of dreams and aspirations to be fulfilled but clueless of what?how?when?.During the past four years I changed myself from a shy girl to strong and more confident individual.

Being a pampered child I always used to get up at 9 but college changed everything, 85% attendance was something unusual and auroral for me but thanks to the support of my friends who made each day even more exciting, that gave me energy to get up early and I started looking waiting for my little Tin-Tin adventures everyday, be it the first bunk, imitating teachers and many more. I would also like to take this opportunity to thank our faculty and HOD man for their constant support, encouraging us to bring out our talent and always supporting us in everything we did. Even though I never liked and always cursed the 85% attendance scheme but as my college is getting over and when I turn back and look into the journey I would like to thank our principal as this 85% helped me make all the memories that I have now.

Memories are always associated with people and I can never blame anyone because good people gave me happiness, bad people gave me experience, worst people taught me lessons & BEST PEOPLE gave me lot of MEMORIES to be cherished for life time. :-)

**Don't read success stories,
You will get only message..**
**Read failure stories,
You will get some
ideas to get success..!!**

**The tender bamboo
can be easily bent, but
the full-grown bamboo
breaks when an
attempt is made to
bend it. It is easy to
bend young hearts
towards GOD, but the
heart of the old
escapes the hold when
so drawn.**

TELECOMMUNICATION

Since the first day of my college, every day has been a roller-coaster ride with lot of adventure. It was a wonderful experience. KSIT has given me an exposure to various views and people with different understanding of things. I can't believe how fast these four years have vanished with fun, love, study, joy and sorrow. It really astounds me. Here in KSIT I learned to be flexible – learning to manage my time with my schedules, commitments, priorities and other activities. The fest time period is fantastic, chaos everywhere in the campus. This is the time we enjoy and have fun to the most. One more thing I would like to mention is the Placement drives; it was a period of depression, nervousness, anger, hopelessness, cries, and tears. But thanks to the placement Officer who brought more and more companies to the campus and made sure that most of the students got placed. The teaching and non-teaching faculty have been very supportive. I thank my teachers who provided direction to our knowledge and shape to our future. I know, we're one of the naughtiest classes in the department but we love you all and would never forget the lessons of books as well as of life that you have taught us. And I met some wonderful friends, we all met as strangers. Project reviews to campus interviews, nicknames to last bench games, chatting and laughing, sharing of lunch boxes, we all shared elation. We didn't realize then, that we were making memories; we just knew we were having fun. All These memories are just too valuable. I will always cherish these 4 years in KSIT.

Nishan Parveen

Happiness would be living each day at KSIT as if it was the first day of our college. Today when I think of leaving college, I have a heavy heart. It's not because I'll be missing my friends and teachers but it's because I'll be missing all those experiences and good memories that I have accumulated over the years. My first day at college, it still looks like as if it happened yesterday.

My life at KSIT as has been the first of many experiences I've had (the bad ones too :P). This quote "Nothing makes an engineer more productive than the 'LAST MINUTE'" probably best suits my days at KSIT. As much as I hate to admit it, I can't forget the innumerable experiences that I have had with it. Scoring bad in internals, bunking classes, screwing up the finals and many other things that happened have only made me a better person and a student each day at college. They have motivated me towards my roles and responsibilities. Now I can leave this college with head held high and proud as I don't think I was the same person when I first stepped in. I would like to thank my college, teachers, friends (and everyone else) who were a part of this ride as they have their contribution in making me the person that I am today.

Pavan Kashyap

I was sitting in the cell and the name KSIT flashed on the big screen. That is when the joining of engineering happened and so did KSIT. Engineering wasn't a cake walk as told by everyone i too got ragged by seniors. But the best part was my telecom seniors instead of ragging us got all of us a cool drink and started introducing themselves.

That's the difference telecom department had when compared to other departments. The first fest then happened and that's when I got to know people from other departments and the super seniors I met from CS were the best of all. Till today they never considered me their junior and we are the best of buddies. The best part of engineering is that you realize what it is when you come to the end of it!! I was fortunate enough to have my pu college friends again at KSIT too. An amazing gang of people and super friendly seniors is what KSIT gave me. I can say friends for a life time. Most of them say that one's college life depends upon the type of people you have as your friends. I had an awesome bunch of friends and every single day was filled with fun and frolic. The fests, bonding with the juniors and seniors, those mass bunks and outings are a few memories which I carry while leaving this college. Time just flies by!! Signing off

Thank you KSIT!!YOU ADDED A LITTLE MORE COLOUR TO LIFE. You will be much missed.
