

2012 - 2016

*Unwrap your sweet memories with a
smile on your face...*

Souvenir

"You walked in that day,
Inauguration day they said,
Everything around was new for u,
Searching eyes all around,
Among everyone only your Parents were the only known ones
to be found.

It was the quadrangle where you sat down,
Seeing all your future teachers flaunt their careers,
The first speech from the principal,
To First day lazily walking down the college corridor.

New friends that you made,
And all the canteen food that you had,
The first fight in class,
To seeing mechanical guys in a mass,
To searching for pretty girls in the other branches,
To making fun of everyone around.

The best week of the year then came,
Ananya it was, those traditional day pictures,
To dancing to every other song,
From texting your crush in class,
To eating the lunch hiding from your lecturer.

Counting in formal on the graduation day,
Giving your project reviews and having your say,
From having an intense group discussion for a mass bunk,
To looking into your friend's eye and saying that you will flunk.

Cheating in the exams,
To getting caught doing the same,
Getting successfully placed,
AND treating your friends for the same.

Yes you did it all,
The nod that you give reading this,
Says it all,
Yes! seniors it is you."

- Dedicated to seniors by Adithya Pasi, MED

SOUVENIR TEAM

Message By Editor

Editorial team feels proud to present Souvenir for the batch 2012- 16. This is a recollection of memories to all the final year student who have spent their blissful chapter's of their life.

*ALL THE BEST TO ALL OUTGOING
STUDENTS!!*

*Great photos of the great moments always give
us a great joy!*

CLASS OF 2016

At the outlet we send our greetings to the editorial board of the Souvenir committee for bringing out its second edition. We congratulate the entire souvenir team the vibrant faculty and student co-ordinators for their outstanding job. Engineers play a vital and important role in Nation building. They create new inventions using best Engineering technologies to make human life more comfortable, secure and productive in modern times.

Everybody in the world is looking for peace and the need of the hour that is moral and spiritual values along with education. Our young students are brave hearts and stepping out of the college, the future of the society and country. At KSIT we provide a complete package of Moral, Spiritual, Wonderful values in life. Keep up the spirit and flag of KSIT roaring high in the world. Don't compromise on values.

BEST WISHES.

MANAGEMENT

Dear KSITians!!!!!!

It is with great pleasure, we release our KSIT souvenir representing our all time unity. Our aim is to build fond memories spanning from your college years to your life in the adopted homeland. We had the collective passion to create a vibrant link, a link that can sustain the unique character of your wonderful beginnings.

Further, in KSIT we attempt to inculcate values of personal excellence and concern for others. In addition to vigorous academic activities, college is also focusing on the overall personality development of the students. As a student of this college, you to assume responsibility and to understand the value and worth of self discipline, professional morality and work ethics. It is our duty to ensure that, you understand your responsibility to work consciously for creation of India inhabited by peace loving, capable and cultured people.

I would encourage you to visit college and acquaint yourself with various activities, involve yourself in alumni committees to enrich your juniors with acquired latest technical knowledge. I hope by completing your four year term in this college, you should be equipped with quality knowledge and an attitude akin to highly inspired, self motivated, having a positive mindset, devoted to the service of the society and inspired to continue to excel in engineering profession.

Last but not the least, you are advised to always work to protect and enhance the fair name of KSIT as it will be your identity for life. I advise you to be ultra vigilant and protect your own and your Alma matter's interest. It is my sincere hope that students of this College shall bring pride to the institute and be worthy citizens of our great country.

Thank you and wish you all the best!

Dr. T.V. Govindaraju
Principal/Director

MANAGEMENT COMMITTEE

SITTING (LEFT TO RIGHT)-

SRI R.LEELA SHANKAR RAO (Joint-Secretary), **SRI K.VENKATESH NAIDU** (Hon- Secretary), **SRI K.SHIVA RAO** (Vice-President) , **SRI Y.RAMACHANDRA NAIDU** (President), **SRI T.RAMACHANDRA NAIDU** (Vice-President), **SRI B.LOKANADHA NAIDU** (Joint- Secretary), **SRI SRI D.RUKMANGADA** (Treasurer), **SRI L.,KRISHNAMURTHY** (Internal Auditor)

STANDING (LEFT TO RIGHT)-

SRI T.NEERAJAKSHULU NAIDU (Chairman Hostel Committee), **SRI M YOGAMURTHY** (Chairman Finance Committee), **SRI M.C.VARADHARAJULU** (Director), **SRI DJAGADISH KUMAR** (Chairman Hospital Committee), **SRI N.KRISHNAMA NAIDU** (Chairman Building Committee), **SRI M.N.PADMANABHA** (Director), **SRI N.M.KRISHNAMURTHY** (Director), **SRI T.KUMAR** (Director), **SRI P.B.PRAKASH KUMAR** (Chairman Transport Committee), **SRI A.V.NAGARAJ** (Director), **SRI M.SUDHAKAR** (Chairman Legal Cell).

MECHANICAL

MECHANICAL ENGG. & LIBRA

MECHANICAL ENGINEERING

"KSIT has provided me enough opportunity to have a challenging and stable future. The infrastructure backed with excellent faculty has made us professional and knowledgeable. Through the dedicated faculty I have had excellent opportunities to attend workshops, participating in paper presentation competitions, attend seminars and have gone lengths to make us all fit in the job market. The college has also provided me with enough extra-curricular activities such as being a member of Emancipation, organizing events, participating in other competitions as well. This created a platform to express my thoughts and creative ideas. KSIT has equipped us to face the challenging opportunities. Four years at KSIT has helped me develop professionally and molded me into a better individual."

TEJASWINI NAGESH

"I'm indebted to my father for living, but to my teacher for living well" as quoted by "ALEXANDER THE GREAT", was proven right by the teachers of KSIT. When I first stepped into KSIT college I never expected my life to take such a wonderful phase....! Initially, when I was in first year I thought my Engineering life would be study oriented, but as I entered MECHANICAL branch it all changed..... Teachers were so experienced and Knowledgeable that they not only helped me to excel in academics but in building my character. They were very much supportive in all ways. I came across some superb personalities and nice friends in these years who will always be a part of me for the rest of my life. I honestly enjoyed to the core and when I look back now, I see everlasting fabulous memories. It gives me an immense pleasure and proud feeling to be a part of MECHANICAL family in KSIT college.
I'm gonna truly miss.....!

MOHAMMED MAVEEN

"My path to a professional career started in this renowned institution, K S Institute of Technology. My interest in the field of science and passion to learn about technology was what led me pursue engineering, having been fascinated about machinery ever since my childhood is what drove me to take up Mechanical engineering, which is also one of the oldest and broadest of the engineering disciplines. My study at KSIT has been more interesting and enjoyable than what I could have ever imagined, be it the classroom teaching, laboratories or the extra-curricular activities. Every lecture was made interesting and the teachers would go to great lengths to co-relate all the aspects to current technology so that we stay ahead in the field. The best aspect of engineering studies is the laboratory sessions, the satisfaction of designing and machining components is overwhelming. Apart from classroom studies KSIT highly encourages students to take up extra-curricular activities, the most memorable will be the college fest ANANYA and the annual college sports day.

KSIT has provided me with an unique opportunity to be a part of its SAE BAJA team. The management, Principal, HOD and all the faculty have been nothing but supportive and encouraging in all the aspects. Very few have the opportunity to design and build a race worthy vehicle during their undergraduate studies, I am grateful having been given such an opportunity. This has helped me immensely gain knowledge and also made me a better engineer. Graduating from this institution I will be talking a lot of fond memories like the knowledge gained, friendships made and last but not the least working with the BAJA team.

ABHISHEK R.KALOSE

"Education is the most powerful weapon which you can use to change the world." Firstly I would like to thank editorial team for giving me this opportunity. Success of students depends on faculty and management of the college. Our department has knowledgeable professors whose continuous support and encouragement in every aspect helped me to build as a competent mechanical graduate with good foundation. To me, college stands for getting a higher education to help me succeed later in life. I joined as a lateral entry student in the year 2013 throughout these three years of my life, department has helped me to find out the kind of person I am going to become. College education means everything to me. It is going to be something you can't put a price on, because it will be so valuable and priceless to me. I'm a totally different person than I was coming in as a freshman three years ago. I've learned so much about my field, my interests, myself, and so on. Our department and management helps every student in their education and research activities. I would like to thank each and every member of our department and management for their support and encouragement.

COMPUTER SCIENCE

Computers... "Is it a Wizard in a box!" I thought to myself when I watched a huge futuristic machine doing amazing things in a sci-fi movie. My love for computers grew stronger when I started my journey in this College. At first I was full of doubts, if I would live up to my dreams of becoming a software engineer. However, the Training & guidance provided by our CS faculties has made it all possible. Engineering provides the techniques for building hardware & software but our real sculptors, who have shaped our future are our dear faculties.

On fresher's day, like every other student enters a professional College, with a fear of whether this is a place where I can cope up, and with a fear of ragging, even we entered the college with lots of doubt in mind. But it was there for just 1 day, 1st year in basic science department where we got the jest of basic branches of engineering and added to the feeling of choosing computer science was a right decision. 2nd year (when we actually started our Journey as Computer science students), the time we entered our core branch and there the fun of learning began. Theory classes, where we learnt concepts and Labs where we learnt practically, workshops in every semester as a means of updating ourselves with ever changing computer science field all got us ready for the real challenges of the future. Same thing continued in 3rd year with extra mini project where we actually focused on implementing concepts. At the end of 3rd year we were called "partial software engineers". At the end of 8th semester with jobs in our hand, as we step step out as complete software engineers I would like to thank everyone in the CS department who have envisioned our dreams and made them come true I am thankful to all of you from the bottom of my heart. Thanks to the wonderful staff that has always been with us and guided us in every step of this long journey.. Thank You One and All..

TEJASWINI NAYAK

With just the blink of an eye, 4 years of our engineering life in this college is coming to an end. I wouldn't want to sugar coat and say that my days in this college were always amazing. I'd rather compare it to a roller coaster ride, there were some ups and some downs. From a young age, I was looking for a place where I'd get to learn and get more insight in a course I was so curious about and K.S Institute of Technology seemed like the place I was meant to be in. From the endearing teachers of the 'Basic science & Humanities' department, who made the courses ever so fun in our early years to the impelling teachers of the 'Computer Science' department who taught us all that we know today, I'd like to thank them all for always being there. My experiences here have taught me to learn from my mistakes, to have fun, to share knowledge, to never give up and to never forget that I am here to learn and not to study. Looking back now, I got to say, that overall it was one hell of a ride. I don't want to cry that college is over, but smile because all of it happened and it happened to all of us.

SPOORTHI M

My dream of becoming a Computer Science Engineer came true with KSIT I was a Biology student in Pre-University and heard lot of my friends telling that programming is really not a cakewalk for a Bio student. I entered college with this fear. The first year with the programming was a good experience. The faculties of the department made it easy for me! This boosted me and a sense of confidence bloomed. It was my privilege being the student coordinator for the Computer Society of India (CSI) as I have an awesome experience. The Department of Computer Science and Engineering has clubs through which workshops are organized. These workshops help in understanding the new technologies. There were workshops on Cloud Computing, Android, Web, debugging in C and many. Industrial visits are organized once a year. I had been to an e-waste management and BIFC on industrial visit. Also, we were involved in the neutrality awareness campaign which was in association with the Free Software Movement Karnataka (FSMK).

The Research group organized the first ever vocational course after my 5th semester, during the vacations. The major focus of the training program was to bring awareness to the students about the current research frontier so that students can develop research skills and become an industry required technocrat. Many domains were included like Web, Android, and Cloud Computing. This helped me in utilizing the holidays for the better. At the end of the day all we want is placements! Every semester beginning we were put into a week placement training. It was fun and informative Placement activities began in the 7th semester and a pool of companies were invited. My dream of having an offer letter in hand before going out of the campus is fulfilled. Coming to the fun part, the annual fest Ananya. There are street plays, dance competitions, singing competitions, gaming events, fashion shows. I have a basket full of memories to carry from the days spent at KSIT.

ELECTRONICS & COMMUNICATION

"Since it's inception, KSIT has established itself as a dominant force in the field of engineering education. It stands as a forerunner in the field of both academics and extra curricular activities. Over the years, it has been an epitome of values and culture. It has opened up a large venue of opportunities for each and every member that has been a part of this institution. It has been a guiding light for many of us and shall remain as one of the pioneers of modern education of our country! ECE branch paves a special path to those who are willing to look beyond the horizon. It defies beauty to those who truly believe in the nature of its teachings! I would like to take this opportunity to thank the principal, management, HOD of ECE and all my teachers for all the support and encouragement throughout my journey at this esteemed institution. Time and again, the energy roars through the corridors and the classrooms, for we stand together as one, united - ECE!"

S.NAVYA SRI

I was fortunate enough to pursue my post graduation studies in ECE department of KSIT College. "The best teacher teaches from the heart and not from the book". For the faculty of ECE department, teaching is more of a passion than profession. The department has highly qualified, experienced and dedicated faculties aiming to achieve a balance between depths of knowledge. Our Head of Department, Dr. P. N. Sudha, has more energy than half the students on the campus. Her genuine love for teaching inspires the students to love the subject. She is best described as, "A Teacher that takes the Hand, Open the Minds and Touches the Hearts". In conclusion, KSIT is one of the best places to pursue engineering. If you are motivated and not afraid to reach out to the other people, KSIT is a place where you can get education and not merely the degree.

NAZARE KANCHAN
(MTECH)

I Faizuddin, N from the department of ECE, am immensely happy Nd proud to be a part of the institution and the department. It has provided me all the ethics and values along with the best education one can have. I can't thank enough for all the support of teachers and management in all of my endeavours. I am leaving here today with a wealth of knowledge which I will always treasure. Studying here has been a fantastic learning experience and I am thankful for the skills I've acquired. Department of ECE is unique. It gives u knowledge beyond the syllabus. The teachers have made sure that we get the best. Its been a pleasure studying in the department of ECE and I will truly miss it. I take with me fond memories and valuable skills. A big THANK YOU for KSIT and the department of ECE.

FAIZUDDIN.N

Fabulous and rewarding is how I would describe my past four years at K.S.Institute of Technology! Their strong academic programs, readily accessible faculty, and a variety of student resources create an excellent learning environment for me to gain knowledge and most importantly, confidence in the workplace! Thank you, Management, Principal, teaching and non-teaching staff of ECE Dept. of KSIT. I thank my beloved, supportive, friendly and encouraging teachers who have provided us the freedom and confidence to get prepared for any endeavours in life. Labs are well equipped and have helped me analyse the concepts in a better way. Within the past few years, KSIT with the support of EC department has helped me with a huge number of co-curricular and extra-curricular activities - paper presentations, IEEE, event management, cultural skills, competitions and sports to name but a few. Although many people would find such a busy and chaotic life hard to handle, KSIT has taught me that organisation, time management and hard work are the skills that are going to help me through life. I thank each and every one from KSIT for making my engineering days so colourful and memorable!

**"Happiness is when
 what you think,
 what you say, and
 what you do are in
 harmony."**

-Mahatma Gandhi

- Nelson Mandela -

Electronic

Happiness was at peak when I made it through one of the esteemed engineering college in the city. After a long wait the day had finally come, standing in front of the gate and seeing the collage board- K. S. Institute of Technology. I read the name in my mind, it gave me Goosebumps. We had orientation program for the first years where I saw many of my seniors getting rewarded for their excellence. The best thing happened is entering telecommunication department. Along with my constant focus, hard work and encouragement of the staff I managed to score well in all the years.

The best part of the faculties of our department is that they never lose hopes on their students and they are more like friends to us. We had full support in organizing events and technical talks which was a great success. I whole heartedly thank all my faculties for their support. Our placement cell provided us many wonderful opportunities to have a better scope in our lives and shaping our carrier.

I always felt at home at Telecommunication department. Proud to be at KSIT. Proud to be at Telecommunication department.

Rashmita Prabha

I started my journey at KSIT 4 years ago standing at the verge of pecking at what life ahead would look like. I was very anxious. The days I spent at KSIT have played a significant role in formation of the person that I am today. I walked into the campus with a passion to become a telecommunication engineer. Whenever I think of my college days memories come flooding in. Especially the togetherness I experienced with my classmates and the staff. I never used to miss my house when I come to college, because I used to get the same care, love, affection and support from each and everyone in our department. Apart from providing excellent teaching what I like the most about our department is the support we get from our faculty for organizing events, be it cultural or technical. However time for us to part and step into different phases of our life. Saying goodbye to KSIT is not so easy but still all good things must come to an end. Thank you KSIT for adding some more colours to my life.

Nayana, B. S

In my pre-university days I always yearned of becoming an "Engineer". The beautiful journey of my engineering started when the name KSIT got flashed on my computer screen as results for college allotment were announced. I was so excited all along the way to KSIT and finally reached there. I had dreamt to be a topper when I entered the college and there my determination and entanglement began. As the saying goes "*nothing is impossible*", I could do it and I am proud of it. I can still remember my first day at college, had lab in the first hour, where I got to know my classmates and there the beautiful journey of engineering unfolded. Each and everyone supported me, we celebrated everyone's birthday, shared our emotions and our friendship got stronger. The best part in The Department of Telecommunication is the strong support given by faculty during my tough time. The placement cell provided us with lot of opportunities to get placed in various reputed companies. KSIT has taught me virtues and values that I can carry throughout my life. I became bold, confident and ready to face the challenging world. Finally the day has come where I would like to thank all my faculties and friends for their love and care. The memories will last forever!

Sahana, H. B

It is my privilege to share few good experiences that I have come across my life in K. S. Institute of Technology. During first year of my engineering, lecturers of basic science department were very encouraging and cooperative which helped me to score very good marks. But when I entered second year, the subjects were quite difficult, and the concepts were different from what we had actually learnt from the previous years. But my lecturers of telecommunication department helped me to understand the concepts and made it simpler, easier and they helped me to score better. They also guided me to present a paper in National Conference "Tantragnana 2". Apart from all this the personality development program conducted by placement department from our college helped in improving my soft skills and aptitude. Due to which I got placed in esteem companies like Infosys and Capgemini. I am very happy to be a part of Telecommunication engineering department which has given me best career path as well as good friends and tons of memories.
