

Vol. 4

SOUVENIR

Batch of 2014 - 18

SOUVENIR TEAM

FOUR YEARS OF LIFE

When we came here, we weren't clear
About anything that we are gonna face for the next four years;
The voice from the depths of our minds was the only thing that we
could hear,
Asking us, "how are we gonna jostle against the challenges that are
bound to appear?"

So many friends but
Only some got near and dear,
There were some untold stories which no one got to hear
While some rumours which spread like a wild fire.

We all first learnt the concept of Fourier
Then some of us understood the working of Gear
While some studied the Software structure
The rest of us imbibed the contents of the Microcontroller and
Communication using optical fibre.

We all have felt the same fear
When the exams were near,
While many got cleared
Some got arrears.

There wasn't any discrimination between junior and senior
We all lived together in harmony like a family member,
Every one of us loved this amazing journey of four years and
if provided would have relived those moments forever.

Although we are all graduating and leaving from here,
Heading towards our own destinies and focusing on career
We are all talking loads and loads of memories with us
For years to come to remember them and cheer.

- **Karan .M .N, ME**

Message by the Editor:

Warmest greetings from the editorial team of Kamavani Sangham Institute of Technology to the fourth Edition of Souvenir being released today. Life becomes memorable and meaningful by these acts of amalgamation of association and camaraderie & it is of paramount importance to record all the events. Souvenir which means a thing that is kept as a reminder of a person, place events or life does the same. We the editorial board of Kamavani Sangham Institute of Technology have done our duty to the best during the past 4 years of your stay in college by recording all your activities and presenting the same before you.

Dr. K. V. A. Balaji
CEO

"ENGINEERING IS METICULOUS PLANNING WITH ORDERLY EXECUTION WITH TEAM SPIRIT TO DERIVE TOTAL SOCIETAL SATISFACTION"

Engineering is a profession that is approached with passion to make the society a better place for all. At K.S. Group of Institutions we strive to train such professionals who give their best efforts to make their parents, their families, their society and their country proud.

At K.S. Group of Institutions we deem it our responsibility to groom our students to have an overall development and be a responsible citizen of this country.

I wish every student of this great temple of learning the very best in both their professional as well as personal lives.

Our Vision:

"To strive continuously to impart quality technical education with ethical values, employable skills and research to achieve excellence."

Our Mission:

- To attract and retain highly qualified, experienced and committed Faculty.
- To create relevant infrastructure.
- Network with industry and premier institutions to encourage emergence of new ideas by providing R & D facilities to achieve excellence.
- To inculcate professional and ethical values among students with employable skills and knowledge acquired in transforming society.

MANAGEMENT COMMITTEE

SITTING (LEFT TO RIGHT)-

SRI R.LEELA SHANKAR RAO (Joint-Secretary), SRI K.VENKATESH NAIDU (Hon- Secretary), SRI K.SHIVA RAO (Vice-President) , SRI Y.RAMACHANDRA NAIDU (President), SRI T.RAMACHANDRA NAIDU (Vice-President), SRI B.LOKANADHA NAIDU (Joint- Secretary), SRI D.RUKMANGADA (Treasurer), SRI L.KRISHNAMURTHY (Internal Auditor).

STANDING (LEFT TO RIGHT)-

SRI T.NEERAJAKSHULU NAIDU (Chairman Hostel Committee), SRI M YOGAMURTHY (Chairman Finance Committee), SRI M.C.VARADHARAJULU (Director), SRI D.JAGADISH KUMAR (Chairman Hospital Committee), SRI N.KRISHNAMA NAIDU (Chairman Building Committee), SRI M.N.PADMANABHA (Director), SRI N.M.KRISHNAMURTHY (Director), SRI T.KUMAR (Director), SRI P.B.PRAKASH KUMAR (Chairman Transport Committee), SRI A.V.NAGARAJ (Director), SRI M.SUDHAKAR (Chairman Legal Cell).

It gives us immense pleasure to know that our college Kammavari Sangham Institute of technology is releasing it's fourth edition of Souvenir and we are happy and feel privileged to forward this message.

Engineers play a vital and important role in nation building. They create new inventions, technologies to make human life more comfortable, secure and productive.

As graduates from this college you have created a niche for yourselves and certainly a source of inspiration to all your juniors.

We take this opportunity to congratulate you all for the good work you have done and all that you have achieved in this college from past four years and this is also the time for you to give back something to your Alma mater by fostering Goodwill and support and be the best brand ambassador of your college.

BEST WISHES.

MANAGEMENT

As the principal of this esteemed institution, it gives me immense pleasure to be a part of the fourth edition release of the college Souvenir, and to deliver a few words of inspiration to my outgoing students.

An engineer's role in every human's life becomes consistently significant as time and technology progresses.

This field is a constantly progressive one, that changes its course in accordance to daily life requirements.

As Engineers, we strive to create, innovate and build new products every day, thus making Engineering one of the strongest pillars of higher education.

On that note, this institution has provided you with the required foundation and has shown you the right direction for recognizing, developing and harnessing your innate intellectual abilities. In turn, we expect the pursuit of perfection and success in the coming years of your professional life.

As a proud teacher and guide, I congratulate each and every one of you for all that you have achieved over the past four years in this college and wish you nothing but success in all your future endeavors.

Good luck.

Jai Hind
Dr. T.V. Govindaraju
Principal/Director

"Every new day is a new chapter" – so was mine with KSIT! When I draw myself back to the first day where we were addressed by Dr. Jayakumar on how an engineering student should be moulded to be successful, I thought for myself, Can I do it? Today, after years I can proudly say "Yes I have done it!"

If it was all books, I would have surely failed in making my engineering life memorable.

I'm glad to have worked with several teams of the college. The most closest to my heart being the Editorial team and Team Emanation. I thank Prof. Umashankar for encouraging me and having me as the lead for both these teams. The editorial team helped me enhance my creative skills and also improved my writing ability. With not just that Emanation helped me understand about how team building works and what characteristics a team player and a leader should possess. This journey would have never been possible without the guidance of our HOD Dr. K. Ramanarshima, and all the lecturers. I thank them all for assisting and directing me in the most ideal path and making me an Engineer today!

- **KUSHAL K BHARADWAJ**

When I joined KSIT, it was a whole new experience, a whole new world, it was the place where I would be giving shape to my future. Soon, we all came closer and became friends and today it's more like a family. The journey here was like a teacher which taught us all about handling different situations in life. We learned to laugh in the most adverse of situations and to find happiness in simplest of things. **Royal Mechanical** they said and we lived in the same way, we were divided by classrooms but united by the department. We all together learned, enjoyed, bunked classes, hosted events, launched clubs, formed teams to participate in national level competitions and celebrated together when we accomplished tasks. This was all possible only due to exponentially increasing support from our beloved HOD, and all the Professors. I have used 'we' instead of 'I' often because we've all had our own share of bitter and sweet experiences here and instead of me writing down my own for you to read, it would be better to take a moment individually to remember our own and rejoice together in the fact that we've made through this phase of life well. All the Best Folks! - **NAVEEN KASHYAP**

Let us remember to this day: every teacher, every internal, every friend and whoever made the last 4 years special. With every new journey begins a new challenge and when I entered the college such was the state of mind. A new challenge set through the last 4 years with tons of memories to take away. Throughout the course of 4 years, we made friends, fought, bunked and even fell in love. The last-minute submissions, running around for hall ticket and even partied all night long is something every one of us have done. Memories of having a laugh with teachers, jumping at the thought of having a free batch and even getting marks in Internals. The pride of seeing a vehicle built in months racing amongst others in the track is a memory I will cherish for all my life, the support from everyone has been enormous. All of this wouldn't have been possible without the support of the entire department of Mechanical Engineering, and everyone else who have been a part of this journey. Thank you for every opportunity you gave and all the encouragement you gave in every endeavour of us.

- **ADITHYA PAIU**

"The penultimate journey with full of surprises started four years ago". These four years at "KSIT" was just like a blink of an eye but with a ton of memories. Being in one of the most resilient department of engineering was a roller coaster ride filled with enthusiasm for me at "KSIT". HOD, lecturers and all my friends were a jump start for my unsteady ride in the Institute. Today when I look back for the crazy four years spent here, which taught me more, but helped me shape my attitude, which have made me what I'm today.

I strongly believe that engineering teaches you everything apart from engineering, from being the initiator of the massbunk to being a professional and from being a hardworker and turning you into a smart worker. **"DREAM BIG, THINK BIG & DESIRE BIG"** which is the best thing I have learnt here. We all have experienced bitter and sweet memories just take a moment to recall it, for you to relive and cherish those moments again. Have a Vision, turn it into a Mission and hold yourself responsible for taking the right Decisions. **YOU CAN MAKE IT!**

First day of school, first day of pre-university and then, it was the first day of engineering. We all thought to ourselves it would be just another new day at a new place. But, little did we know that this was going to be our last few years as students and by the end we would be walking out as professionals. There was one thing that hadn't changed within us as we grew up and that was, "Curiosity". Curiosity is what leads us down new paths. We started off by making new friends, building relationships, setting goals and thriving to achieve them. It was time to make our own decisions. While we celebrated the right ones, we learnt from the wrong. Our parents taught us the value of life, our teachers taught us the value of knowledge and every person we came across taught us something new and made us a better person. As this remarkable journey comes to an end, if you ask me, "How are memories made?", my reply would be, "Just go with the flow"

- APOORVA .R

My aim of becoming a computer science engineer came true with KSIT. As it is lateral entry for diplomates, I joined college during 2nd year of course. Initially it was not easy to cope up with the syllabus and class environment but the faculties of department made it easy for me. This improved confidence in me. There were workshops on "applied cs with android", "raspberry pi", many technical talks and guest lectures. Every semester beginning we were put into a week of placement training. It was fun and informative. Placement activities began in 7th sem and a pool of companies were invited. Coming to the fun part the annual fest Ananya was full of events and activities. Overall it was a good experience and memorable days spent in KSIT.

- VINUTHA .G

"Student life is a Golden life". Perhaps the most enjoyed student life is the engineering life. This is because we enter the course in our teenage and end it in our 20s. Our senses are most awake, thus timestamping each memory like a milestone in the journey. This journey had different speeds in the timeline. Like Einstein's saying "Put your hand on a hot stove for a minute and it seems like an hour. Sit with a pretty girl for an hour and it seems like a minute", the moments of joy with friends seems to have gotten over in a minute. The Computer Science department lent us a guiding hand for us to flourish in our fields. Their support will always be cherished and remembered. Overall, the experience was exciting and I will carry this previous journey lessons throughout my life.

- POOJITHA .K .M

After the end of colourful days of my PU life, I was very much excited of Engineering life and it all started when I entered KSIT. Though I was little tensed of spending life at KSIT, it all changed as days passed. For the past four years we have attended so many events, CSI conference and many of my friends have participated in inter-collegiate events and fests. I think our batch was the best batch to enjoy college life at KSIT. College Fest, Events, Sports day and most important ethnic day were the most memorable days of my college life. Time flies so fast when you are enjoying college life. Though it was filled with pressure and tasks, it was the last sem of engineering. Placements, Projects, Seminars and we were travelling towards the end of Engineering life. Though we were happy of completion of graduation, it was an emotionally filled semester. "True success is not a project but a journey". We realized that we were no more students, soon we will be called as professionals. Thank you KSIT for being a beautiful and important part of my life!

The true sign of intelligence
is not knowledge but
imagination.

Albert Einstein

Great things in business are never
done by one person. They're done
by a team of people.

Steve Jobs

B L I S S F U L

M E M O R I E S

"Peace be amplified and world be rectified" It all began in 2014... with a lot of excitement and expectations, I joined KS Institute of technology and now, I'm happy that I made a right choice then. KSIT is the best launch pad to reach our goal of becoming a successful professional as they believe in imparting quality technical education with ethical values. The knowledge, guidance, and encouragement that I received from my Electronics and Communication Department are valuable which helped me execute my true potential academically and to bring out the best in me. Four years at KSIT is one of the most memorable journey that I would like to cherish for the rest of my life. I'm pleased and grateful to the management, principal, HOD, faculty mentors, staff and my fellow mates for making this itinerary indelible.

—CHETHANA .N. GOWDA

It's difficult to sum up the memories and experience of four years in few lines. I consider myself very lucky for being a part of KSIT. There is something motivational and special in this environment which made us study and enjoy co-curricular activities. These four years were the amazing years of my life. The best part was the time of fests. Participating and organizing events of fests gave me a different enjoyable experience. The campus is filled with positive energy and exuberance. These four years have given me friends for life. I would like to take this opportunity to thank my Principal, HOD, and faculty of Electronics and Communication Engineering department for their constant guidance and support.

—KRISHNA.R. PURUSHOTHAM

My journey at this college began in the 2014. Tall buildings, Green lawn in the middle of these buildings. Going further, I found many photos of students who had been placed in different companies. When I first entered KSIT, I was not a good speaker neither did I have the confidence to mingle. But this college created opportunities for me, which helped me, break all the barrier. Our department has got one of the best Teaching Staff. HOD is the backbone of our Department, not only by the power, but also in the way she takes care of her students and staff. I thank the ECE department faculties and our college for providing me this great opportunity.

—YUKESH .R

Education is the most powerful weapon, which KSIT has provided to all of us in these four years. At KSIT the Management, Principal and Faculty of ECE Department strive continuously to impart quality education along with values. My journey at KSIT began in 2014 and these four years of learning has changed me into a better person.

The college and ECE Department encouraged students to learn, explore and do research activities. The HOD, Faculty and the staff of ECE department helped me to overcome all the barriers and to come out of my comfort zone and to express my true potential. Also, over these four years, I have been able to improve my technical knowledge, interpersonal skills. For this I owe to the Department.

As saying every end has a new beginning...Engineering journey has come to an end! Life as an engineer has to begin. Before starting with new beginning lets recap. Few years back even this journey was a new beginning, where I was traveller unaware of the secret destinations throughout. Well, we all know engineering is a journey of friendship, love, mass bunks, night outs, backlogs, etc. I would like to sum it up with good & bad experience. Good experience gave me happiness without efforts, bad experiences made me realize the value of happiness out of their experiences "I realized that failure was just an event, not a person". Each time I failed, I stepped back - not because I failed, but to take a push, so that I could come back with boost. This journey was with 2 different batch of people. 1st batch "evergreen batch throughout my life". They gave me opportunities to initiate many events. I realized my capabilities. I miss them a lot. 2nd batch started with teacher's day. Interacting about our teachers with their teachers is one of the best experience & memory in my life. Getting good results in academic's by learning the things day before the exam through the phone call is one of the nice experience with this batch. Lunch with non-teaching staff is one of the sweet memory... anyways I always wished to write this post last year but bad luck. I would like to use this opportunity to apologize those people who are hurt by my actions & thank all who were beside me during this wonderful journey— Thank you everyone. **-SRIKANTH S**

B L I S S F U L

KSIT has been a huge part of my life since past three and a half years and it would not be wrong to call it my second home. Though, initially I felt it was not the place where I wanted to be, it took only a few months for this wonderful place to teach me that the greatest ability one could develop is the ability to adapt to change. It would be relevant to quote Stephen Hawking - "Intelligence is the ability to adapt to change". KSIT has provided abundant opportunities and fortunately, I can say I have utilized most of them all. It has always been supportive, from cultural events to technological events, KSIT has been nothing but a positive atmosphere where one can grow out as a strong individual who can survive and bring the best out of any situation. Always grateful for this journey here at KSIT and thanks to all my teachers, non-teaching staff and my buddies. A piece of advice to all my juniors, build a strong clique, work on a project related to any latest technology, build a community where people having similar interests can meet and share their views and thoughts. At the end of the day, it is all about learning and having fun simultaneously, find that right balance and live happily.

SACHIN KASHYAP K

Happiest phase in life is engineering college days, every person was its own unique and everyday a new adventure has to come into picture. Despite of the learning pressure and demand of improvement, an engineer will relish the happiest moment of his life. Engineering life is defined as studying in last moment, midnight coffee, bunking classes, treats, breaking the college rules, having competition with friends as to who will leave the exam hall first, struggling for marks, getting kicked out of class, planning for goa trips. We would always be on our toes to complete the assignment, prepare for internals and back to back external schedules. Memories - would be incomplete without my pals, they made my life simpler and always motivated to achieve something bigger and out of the box, they always stood beside me in all good and bad times. It was my humble and supportive lecturers who guided constantly all throughout 4 years of engineering, picked us when we fell and patted us when we did something great. I would always thank my college for gifting me this wonderful 4 years of life, and always thought how to be better person to live in society and face the hardships of life with a bigger smile on face and gallons of self-confidence.

MEGHANA M A

It's coming to an end. The time has to end, perhaps the most interesting chapter of my book, a chapter many people helped me write. The four years of my life that I will never get to live again is coming to an end. But, the memories, I made with a few people that I was blessed with are etched in my heart and will remain there forever. This college is like a swarm of elites, the way I see it. I consider myself lucky to have been in this college, without which I wouldn't have made any - memorable, and fanciful phases of our life with lots of nostalgic and immortal memories. And yes! College period has been the best phase of my life. College life is a sweet memory in every one's life so let's keep it sweet forever and ever.
