Event description with pictures:

During the enriching Technical Training at KSIT by Destination, from 5th October 2023 to 17th November 2023, students delved into a myriad of new concepts in Skill Development Training On Advanced JAVA. Throughout this 9-days program, their focus on Skill development in Advanced Java is a great initiative, as it opens up opportunities for building robust and scalable applications.

Initially, in the theory session, students explored the concepts of object-oriented, UML diagrams, methods of inheritance, garbage collection, Exception handling, Multithreading introduction, SQL basics revision, crud operations in SQL, Driver manager, steps for connectivity, types of driver software, JAVA Database connectivity using class.forName and using DriverManager.registerDriver functions. The training wasn't limited to theory sessions; there was also a lab session where every learner gained a solid understanding of Java fundamentals through lab exercises.

The overall positive experience emphasizes how these learned abilities could play a significant role in influencing the students' future career paths in the technology industry. The voyage served as evidence of the worthwhile education this training provided.
