### **1. Objective**

The objective of this FDP is to provide an edge over understanding and applications of MATLAB and LATEX software's in the different research areas and technical data publishing through theoretical sessions and hands-on training delivered by subject experts.

### **2. Target Group**

This FDP being interdisciplinary in nature is open to faculty members of all the engineering institutions who are seeking to enrich their knowledge about MATLAB & LATEX and its applications.

### **3. About Matlab and Latex**

MATLAB is a high-performance language for technical computing. It integrates computation, visualization, and programming in an easy to use environment where problems and solutions are expressed in familiar mathematical notation. LATEX is a document preparation system for high quality typesetting is most often used for medium to large technical or scientific documents but it can be used for almost any form of publishing. A latex document is a plain file with a .tex file extension. It can be typed in a simple text editor such as notepad, people find it easier to use a dedicated editor with tags. It facilitates in converting the technical documents into any required format.

#### 4. Analysis and evaluation of the FDP

This FDP aided in enhancing the knowledge and applications of MATLAB & LATEX software in various research domains and publications, which was achieved through theoretical as well as hands-on training sessions conducted by subject experts.
