During her internship, she demonstrated her skills with self-motivation to learn new skills of Additive Manufacturing. Her performance exceeded our expectations and she was able to complete the assigned tasks on time.

Her internship activities include familiarization to all the departments, their operations and process along with a management overview involved in the production process of the organization.

During the period of her internship program with us, she had been exposed to different processes like understanding from engineering for assembling a 3D printer and was found diligent, hardworking and inquisitive.

We wish her all the best in her future endeavours.
